(not negotiation team; felt, but a body that has policy making power, somewhat up "chain of command".)

S4 1/2 The "impassioned" individual is advocating a ~~radical~~ aggressive, antagonistic course of action. He has some support - though not unconditional - from one or two other people present. The rest of the body are moderates ventral to opposed in their regard for this course of action. The "impassioned" individual is a mildly pessimistic of the possibility for successful adoption of his policy, but hopeful that at least some movement in his direction might be effected.

Site is one of several structures on land.

Structure is suggestive of comfortable office building - carpeted, quiet w/ rooms + corridors. ^{more than 1 floor} ~~Outside~~, May have a red roof.

^{Group of} People inside meet. Dark clothes - suits, talk, discuss, consult together, confer. meetings are exclusive, confidential; one individual in group is articulate, ^{emphatic} ~~emphatic~~ in advocating a specific course of action that is cooperative, belligerent, inflexible. He has some qualified support from one or two people present. The rest are neutral or opposed to U.S. position. Strong sentiment in the group that

"anything is negotiable" as long as it doesn't hurt their side at a significant disadvantage. The ^{emphatic} ~~emphatic~~ individual doesn't want to go in. There's ^{abstract} ~~abstract~~ a prevalent sense of timidity + concern - almost a fear - as if the participants are on the side of chronic high tension + living on the edge, & want to move towards a more stable, less tense level of existence.

As a matching/Bk suggested of Soviet side of SALT - not the negotiating team, but a body that has policy making powers somewhere far up the chain of command.

there are more than 20 + fewer than 30 - all males present. A sense of both military + civilian present, not clearly defined between the two.

Room ^{where} ~~where~~ people meet has hard, shiny, floors a black, red, + brown pattern in it. ^{white} ~~white~~ frieze around edge, & may be angled upwards. 19th century style. Wall light color, ^{mostly white} ~~mostly white~~.
